

Description

Flexy Twin

Modular system which allows you to cover large areas with a minimalist but at the same time very innovative design. An aluminum silver powder coated mast and one or two independently closable and tiltable awnings, provide shade where it is needed. The system allows to connect several Flexy Twin. Ideal for contract (hotels, restaurants...) and residential use (villas, private gardens). The canopy closes easily thanks to a simple pulley system. The Flexy Twin can be supplied with both freestanding or ground insert bases. The structure is made of aluminum with stainless steel hardware. On request the mast can be equipped with lights. All FIM Products are designed and made in Italy using the finest materials for outdoor use, ensuring long life even under the harshest environmental conditions.

Solution dyed Acrylic Fabric

Designed for outdoor use, the solution (spun) dyed acrylic fabric resists salt water, chlorine and any type of harsh climate. Colours do not bleed and remain vibrant for a long time. A specific treatment makes the fabric water repellent, mould resistant and protects it from staining. This type of fabric resists the most extreme conditions and is suitable for year-round use in gardens, terraces, pool sides or on-board boats. It's definitely the top choice canopy fabric to select for your Product. UPF 50+ (UV Protection Factor) 280 gr/m².

Micro-Mesh fabric

This fabric allows natural air flow and has an excellent resistance to wind, ensuring a pleasant shading at the same time. Suggested to those who want a surely eye-catching alternative fabric. Its fibre composition, taking advantage of the "Precontraint" technology, guarantees an exceptional resistance to tearing, ultraviolet light and mould. 410 gr/m2.

Airfim Fabric

Waterproof fabric assuring total protection from rain, which does not even permeate the stitches. A stain-resistant treatment contributes toward a better dirt resistance of the fabric, too. A regular wash with a neutral cleaning agent guarantees a long lifespan. UPF 80 (UV Protection Factor) 190 gr/m²

Finishes

The materials used have been specifically selected and treated to maintain our products durability and consistency over time. The lumber we source is the best available to guarantee structural integrity and strength of the product. Given the fact that wood is a "living" material and reacts to temperature and humidity variations it can consequently show gaps or imperfections that are not to be considered a defect. They do not alter its resistance qualities, but rather witness its continuous vitality. The aluminum profiles are powder coated or anodized to ensure a longer durability in time. The colors may differ from the real ones.
