

Description

Flexy Mood

Flexy Mood represents an innovative modular system that allows you to cover large surfaces while keeping the space underneath free. The side poles are extruded in aluminum and designed to accommodate decorative profiles or recessed LED lighting. The system allows you to combine one or more modules with each other, with the possibility of covering large surfaces. Ideal for both contract use (hotels, restaurants...) and residential use (villas, private gardens). The cover, available in both the rectangular and curved versions, can be easily closed thanks to both a manual and electric system.

Materials

Acrylic fabric

Water repellent and stain-resistant acrylic fabric. Available in Ecrù (raw) colour. The ideal fabric, excellent value. 290 gr/m².

A00 Ecrù
A00

Solution dyed Acrylic Fabric

Designed for outdoor use, the solution (spun) dyed acrylic fabric resists salt water, chlorine and any type of harsh climate. Colours do not bleed and remain vibrant for a long time. A specific treatment makes the fabric water repellent, mould resistant and protects it from staining. This type of fabric resists the most extreme conditions and is suitable for year-round use in gardens, terraces, pool sides or on-board boats. It's definitely the top choice canopy fabric to select for your Product. UPF 50+ (UV Protection Factor) 280 gr/m².

Finishes

The materials used have been specifically selected and treated to maintain our products durability and consistency over time. The lumber we source is the best available to guarantee structural integrity and strength of the product. Given the fact that wood is a "living" material and reacts to temperature and humidity variations it can consequently show gaps or imperfections that are not to be considered a defect. They do not alter its resistance qualities, but rather witness its continuous vitality. The aluminum profiles are powder coated or anodized to ensure a longer durability in time. The colors may differ from the real ones.
